SUMMARY

Motivated Computer Science graduate from UITM, with a Bachelor's degree in Computer Science and currently pursuing a Master's degree. Specializing in mobile development, I am dedicated to honing my skills in Swift and Flutter. My commitment goes beyond coding as I prioritize maintaining a healthy lifestyle through regular gym workouts and climbing sessions. Eager to apply and expand my skills, I am now seeking my first experience in the IT industry.

Mobile App for Social Activation - socialEase

🔗 https://github.com/jtrznadel/socialease-app

Lead Developer, responsible for the conception and implementation of the entire application, including UI/UX design, business logic, database management, and system architecture.

- Project Overview: socialEase stands as a engineering project, crafted to inspire and mobilize communities. Its mission is to encourage involvement in pro-social activities, empowering individuals to play an active role in shaping and enhancing their community.
- Features Overview: users effortlessly manage their accounts, explore and create diverse social initiatives, engage in real-time conversations while being incentivized by rewarding community ranking system. Users can easily discover initiatives through a dynamic search interface blending list and map views.
- Technology Stack: Developed using the Flutter framework, the project integrates various libraries, including BLoC, Cubit, GetIt, Firebase, Google Maps, Lottie, among others.
- Architectural Approach: The implementation follows the BLoC/Cubit pattern and Clean Architecture, ensuring a modular and scalable design.

Mobile App for Budget Management – .budgetBuddy

🔗 https://github.com/jtrznadel/budgetBuddy

Lead Developer, responsible for conceptualizing the application, collaborating with a team to develop the API in .NET, and implementing the entire UI/UX design and business logic.

- Project Overview: .budgetBuddy is a personal assistant designed to help manage daily expenses, achieve saving goals and understand shopping behavior.
- Features Overview: Users can easily manage their daily expenses, set expense limit, create saving goals and access significant statistics to help predict future expenses and understand consumer behavior. The app provides additional features such as managing and personalizing user profiles.
- Technology Stack: Developed using the Flutter framework, the project integrates various libraries e.g. GetX, Dio, Firebase, FL Chart, JWT Decoder, Lottie.
- Architectural Approach: The implementation GetX's Controller pattern.
